

Statistical information

The following information gives statistics about entry to Barking and Dagenham secondary schools in September 2009. It includes the number of people who sent us their application forms by the closing date, and the distance the child given the last place at each of our schools lived from that school. This information should give you an idea of the chance that you have of getting a place at your preferred schools.

The number of applications for each school and the addresses from which children are applying will be different from year to year. As a result, we cannot guarantee that the furthest distances from school for people applying for 2010 will be similar to those who applied in 2009.

Notes

- The information is based on applications received by last year's closing date for pupils starting secondary school in September 2009. This information is useful because it shows the number of pupils given a place under each category of the 2009 admission criteria.
- At the closing date, 180 places at All Saints Catholic School were given to baptised, practising Catholics. Please contact the school for more information.
- Of the offers made for applications received by the closing date:
 - 63% received their first-preference school;
 - 12.5% received their second-preference school;
 - 4.25% received their third-preference school;
 - 3% received their fourth-preference school;
 - 1% received their fifth-preference school;
 - 9% received their sixth-preference school; and
 - 7.25% were given the nearest school to their home with a vacancy.
- The statistics for late applications refer to applications received between 24 October 2008 and 31 July 2009.
- The appeals information is based on the appeals heard between April and July 2009.

School name	Number of applications naming the school as a preference	Standard number of children the school admits (admission number)	Number of children with full statements of SEN naming the school	Number of children given a place due to the LAC criterion	Number of children given a place due to the distance criterion	Distance (in kilometres) the child given the last place lives from the school	Number of late applications received (see note 4)	Number of appeals received (see note 5)	Number of appeals allowed (see note 5)
